Building tomorrow's innovations with today's edge AI-enabled devices

Edge AI technology is making devices more efficient, accessible and accurate – and that's only the beginning

[Read more](#)

Our Passion

At our core, we have a passion to create a better world by making electronics more affordable through semiconductors. This passion is alive today as we continue to pioneer advances in integrated circuits. Each generation of innovation builds upon the last to make technology smaller, more efficient, more reliable and more affordable – opening new markets and making it possible for semiconductors to go into electronics everywhere. We think of this as Engineering Progress.
